10,600 SQFT Residence in Greenwich, CT

STRUCTURAL ENGINEERING SERVICES:

- Coordinate design with architects, builders, owners, and building officials to create efficient framing and foundation systems;
- Ensure the building meets relevant state and local building codes;
- Design of structural framing and foundation systems;
- Preparation and drafting of structural framing plans, details, and specifications;
- Review of steel, engineered wood, rebar, truss and other relevant shop drawings;
- Site visits during construction to verify proper construction practices;
- Responsive and accessible staff to quickly answer any questions during design and construction processes;
- Several of our projects have won state awards or have been featured in national magazines.
